LPT (Liquid Portable Toilet Treatment)

INFORMATION SHEET

Product Description: A super concentrated liquid, odour control formulation, made exclusively for the portable toilet industry. It actually causes a biological change in waste matter, so that it cannot produce odours – while rapidly digesting solids. Even on the hottest days! **LPT** is 100% natural, biodegradable and environmentally safe, with a mild fragrance, in a dark blue formulation specifically for toilets where the waste is visual.

Applications:

- Site Toilets
- Event Toilets
- Mine Toilets
- Portable Toilets where the waste is visual

Benefits:

- 100% Environmentally safe and non-toxic
- The product contains no harmful chemicals, bacteria or enzymes.
- End product is safe to dispose in septic systems, pit toilets or waste drop points.
- Decomposes Solids from sides of tank
- LPT's effectiveness increases with any rise in temperature, ensuring odour control on hot, humid summer days.
- No fuss, single application, single product
- Cost effective
- Inhibits Faecal Coliform Growth

**We guarantee our product is 100% safe for the environment!
It will even improve your septic system!**

Working with Nature- Not against it!
